

# Solver + Binary Stream for SaaS

Together Solver and Binary Stream transform planning, reporting, and analysis to accelerate better decisions for SaaS companies.

Set up, manage, and gain insights into your ERP's recurring billing through a seamless, scalable engine designed for Microsoft Dynamics 365.

## Single source of truth

Adjust contracts mid-term, directly within Microsoft Dynamics 365. Eliminate costly manual errors and duplicate entries by leveraging the native data structure.

## Predict future performance

Gain visibility into cashflow, profitability, and expenses. Leverage advanced budgeting and forecasting capabilities to model scenarios and drive strategic decisions, keeping your SaaS company agile.

## Streamline subscription processes

Automate your recurring billing and revenue recognition practices. Handle complexity with ease and scale as your business grows.

## On demand KPI reports

Analyze your SaaS business with ready-to-use reports and dashboards for your industry. Drill into key metrics to uncover variances and optimize performance.
