

Simplify intercompany accounting with **Multi-Entity Management**

Streamline multi-company operations directly in D365 Business Central

Solve intercompany challenges in **Dynamics 365 Business Central**

Multi-Entity Management (MEM) is a comprehensive solution for multi-company and consolidation accounting challenges. Built to manage the complexities of intercompany transactions, it enables organizations to gain complete control of all entities and solves common multi-entity challenges in Business Central. Designed with flexibility at its core, MEM meets your organization's unique needs to ensure your success as you scale

Year Finalist
for 2021**

Understanding the benefits of **Multi-Entity Management**

Simplify intercompany transactions

Unlock the ability to easily perform intercompany transactions across all modules of Business Central, simplifying financial workflows across the entire organization. Automatic intercompany balance tracking allows streamlined organization-wide financial tracking and period closing.

Real-time consolidated reporting

With MEM in place, almost any Business Central report in any module can be run for individual entities or across any number of entities, reflecting fully real-time data.

Streamlined process to add new companies

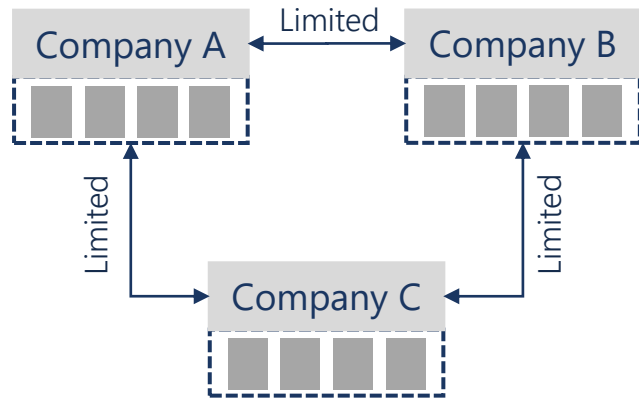

Add new companies with a few clicks and accelerate the initiation of transactional and reporting activities for new operations or acquisitions.

Global Master Record Lists

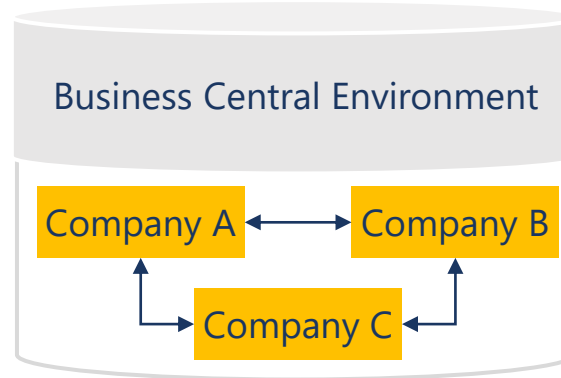

Define a single set of records across all entities or certain subsets of entities for customers, vendors, bank accounts, items, and more. Updated data is reflected in real time with no requirement for duplication or synchronization of data.

How **MEM** works

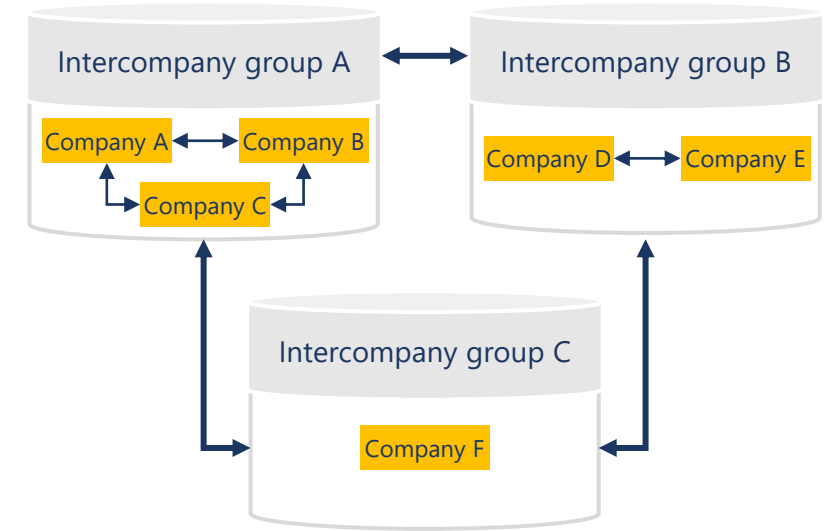

Dynamics 365 BC

Separate Business Central companies, limited intercompany transactions, and siloed data

Dynamics 365 BC + **MEM**

Advanced intercompany transactions, unified data, and enhanced reporting capabilities

Dynamics 365 BC + **MEM and ICS**

Advanced intercompany transactions, unified data, enhanced reporting capabilities, across multiple FY ends, local currencies, and localizations

Multi-Entity Management

BY BINARY STREAM SOFTWARE

How we compare

Microsoft Dynamics 365
Business Central

Multi-Entity Management

Intercompany Transactions

Real-time intercompany transactions tracked in one central view

Centralized payables and receivables processes; pay from or receive to a central entity on behalf of all or some entities

Mass decentralize payables; generate individual payments on behalf of all entities or any number of entities in a single batch

Intercompany transactions in the inventory, fixed asset, jobs, and assembly modules

Intercompany transactions in the service management, and manufacturing modules

Basic financial transactions across entities with different fiscal year ends, local currencies, and localizations

Intercompany journal entries involving 3+ entities

Allocate revenue and expenses across entities with a defined template

Track and transfer inventory across entities

Manage and transfer fixed assets across entities

Sell and ship goods to or purchase and receive goods from another entity's warehouse

Real-time Combined Reporting

Real-time combined or individual reporting for all or some entities

Real-time Combined Reporting

Multi-entity reporting in the purchase, sales, bank rec, inventory, fixed asset, jobs, assembly, service management, and manufacturing modules

Multi-entity reporting in the financial module

Limited functionality

Integration with 3rd party advanced reporting solutions

Global Master Record Lists

Single set of vendors, customers, items, locations, and bank accounts

Single set of fixed assets, jobs, resource, and payment methods

Single set of service items and work centers

Synchronization of master records of entities with different fiscal year ends, local currencies, and localizations

Multi-Entity Environment

Easy setup of new entities

Combined chart of accounts

Data access security across all entities

* Support for multiple fiscal year ends, local currencies, and localizations is available with the ICS module of MEM

What some of our **success stories** say about MEM

"It was the only solution on the market that could do what we needed."

Saving \$70,000 annually by consolidating 150 subsidiaries

[Read more](#)

"It saved our sanity. It's so much easier to use."

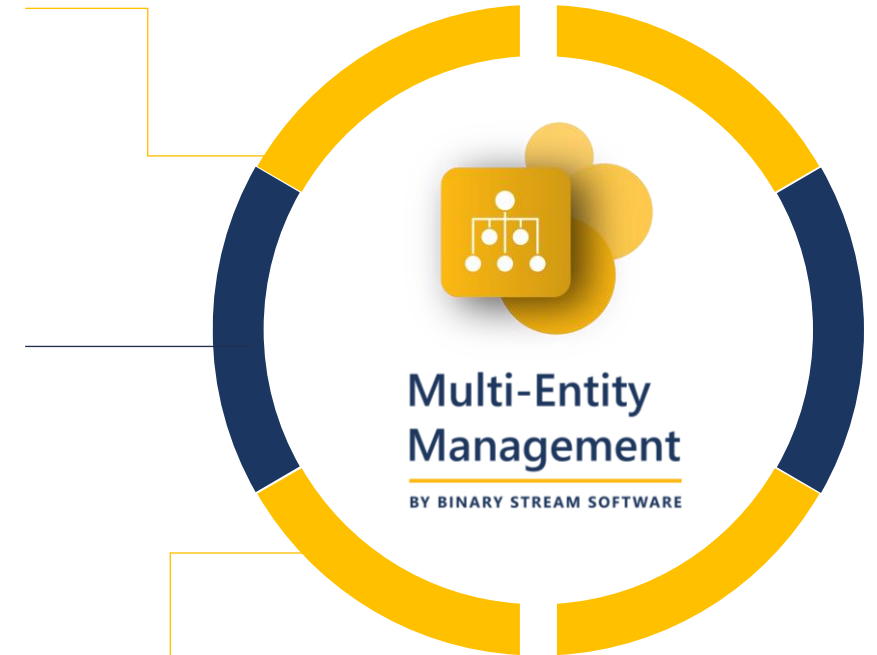

Scaling monthly invoicing for 250 locations without adding overheads

[Read more](#)

"There's nothing else like this on the market."

Saving \$120,000 a year while scaling from 55 to 239 entities
