

Maintain greater control of healthcare supply operations.

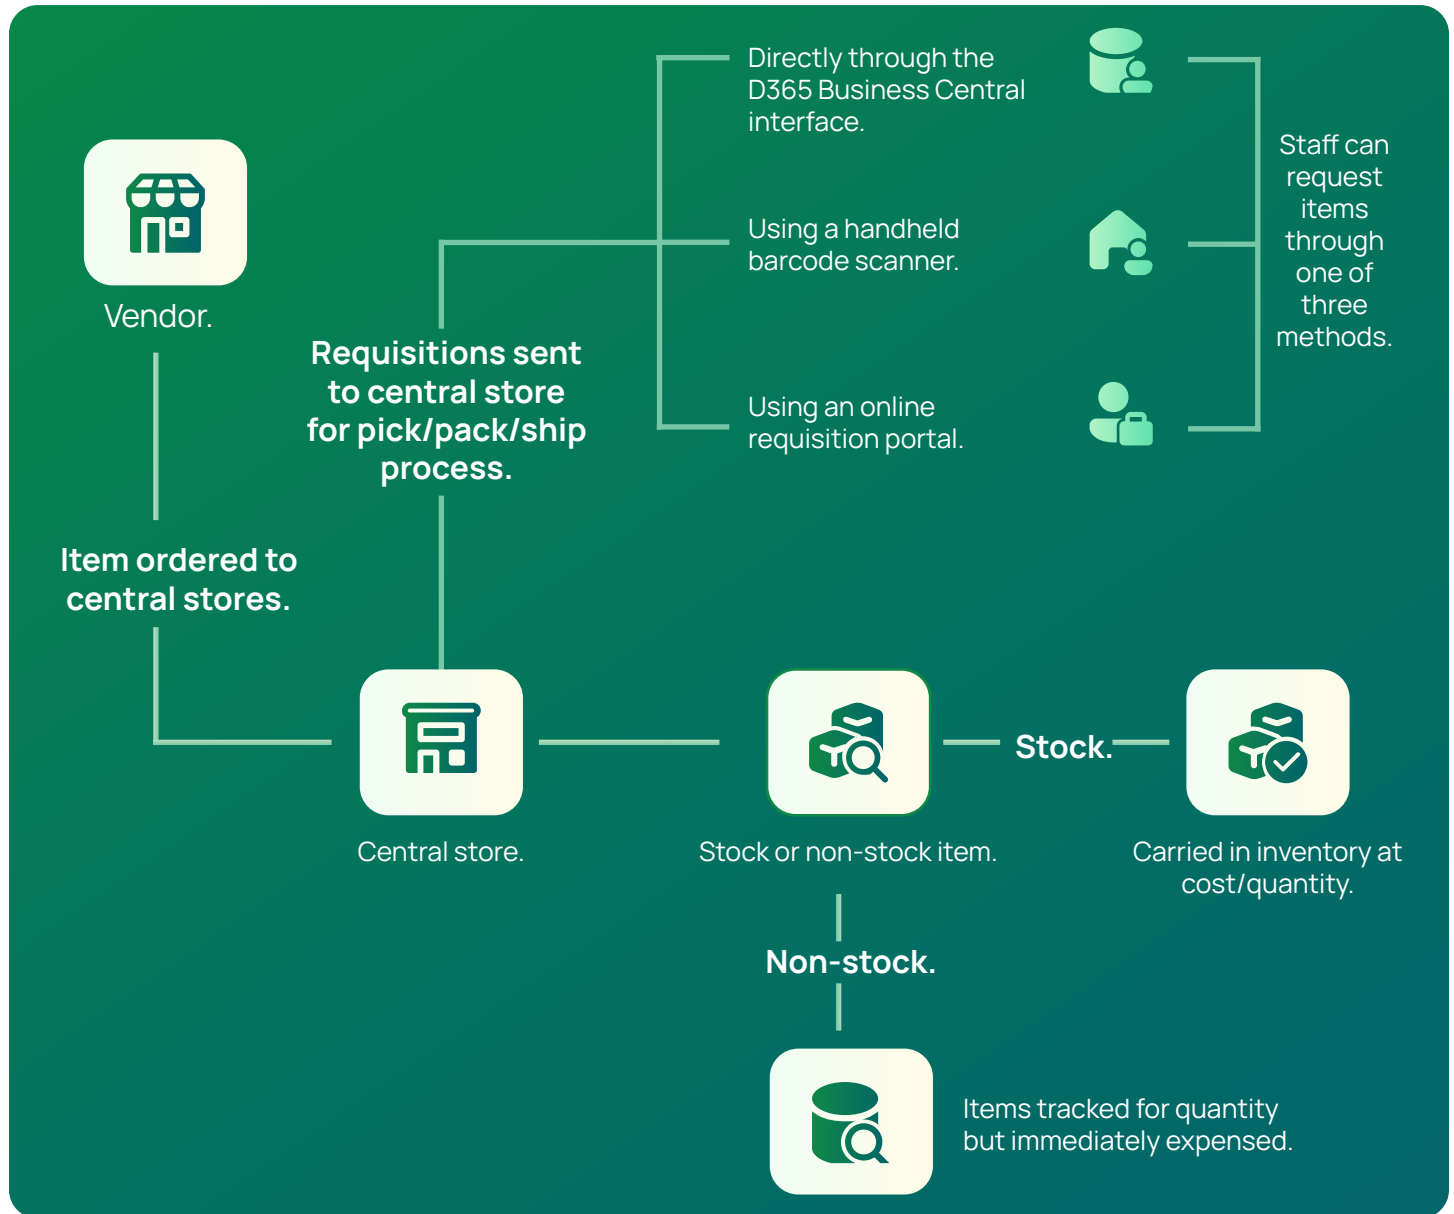

Healthcare Materials Management (HMM) offers a comprehensive solution embedded within Microsoft Dynamics 365 Business Central designed to simplify supply chain operations. HMM eliminates inefficiencies and reduces costs while ensuring that essential materials are available when needed.

Empowering healthcare organizations to scale, control procurement and fulfillment, and gain actionable insights, HMM enhances productivity, inventory visibility, and traceability, all while lowering costs. For multi-entity organizations, HMM integrates with Multi-Entity Management (MEM) to centralize processes and manage multiple entities seamlessly within a single database.

Simplify healthcare materials management with HMM in Dynamics 365 Business Central.

How HMM functions in Dynamics 365 Business Central.

From vendor orders to centralized inventory, HMM allows staff to requisition materials effortlessly using barcode scanners, online portals, or directly within Business Central. Gain control over stock and non-stock items while reducing costs and improving accuracy across your organization.
