

# Enhance Accounts Receivable and batch send critical documents with eMailer Manager.

Manually sending invoices, customer statements, and reminders in Microsoft Dynamics 365 Business Central can be inefficient and time-consuming. Binary Stream's eMailer Manager automates batch email delivery, reducing document processing times and ensuring seamless communication with customers.

When used with Accounts Receivable & Collections (AR&C) Manager, eMailer Manager can automatically send reminders based on overdue invoices - a feature neither Business Central nor any competitor offers!

## The eMailer Manager advantage.

### Batch sending of invoices, statements, and reminders.

- Automate the email delivery of posted sales invoices, customer statements, and payment reminders.
- Works seamlessly with Subscription Billing Suite (SBS) to automatically send invoices.

### Advanced email scheduling and history tracking.

- Schedule batch sending using Job Queue to automate recurring document delivery.
- Stores a full history of sent emails—track what was sent, to whom, and when.

### Flexible and customisable email templates.

- Uses HTML-based templates with merge fields (unlike Business Central's complex Word-based tool).
- Pre-built default templates included, with unlimited customization options.

### Unique AR&C integration for payment reminders.

- Automatically batch send reminders based on overdue invoices when integrated with AR&C Manager.
- Two powerful options: ■ BC Reminder Report Delivery. ■ Reminder Shortly After Due Date with Invoice Copy.

## How it works in Dynamics 365 Business Central.

1

### Generate documents.

Invoices, statements, and reminders are created within Business Central.

2

### Batch send and schedule emails.

Automate sending with the Job Queue feature.

3

### Track and resend.

Access email history and resend documents as needed.

4

### Accelerate cash flow.

Ensure customers receive timely invoices and reminders to speed up payments.

## Why choose eMailer Manager?

### Eliminates manual spending.

Automates exchange rate updates for seamless multi-currency transactions.

### Improves collections process.

Works with AR&C Manager to ensure faster payments.

### More user-friendly than Business Central's built-in tool.

Uses HTML templates, stores email history, and automates batch sending.

### Better control and traceability.

View historical records and resend documents as needed.
