Solve data duplication challenges with Merge Utility.

Duplicate customers, vendors, G/L accounts, and other records create inefficiencies and inaccuracies in Microsoft Dynamics 365 Business Central. Binary Stream's Merge Utility provides a seamless solution to merge duplicate records instantly while retaining full transaction history and ledger updates.

Offered exclusively as an annual add-on, Merge Utility is a must-have for businesses importing data into Business Central—especially Subscription Billing Suite (SBS) customers.

The Merge Utility advantage.

Instantly merge duplicates with one click.

- Combine duplicate customers, vendors, G/L accounts, items, and dimensions while retaining all historical transactions.

- Prevent confusion caused by multiple customer/ vendor accounts and outdated records.

Complete ledger and history updates.

- Maintain accurate financial records—all merged entities update across ledgers, invoices, and contacts.

- Sales history, ship-to addresses, and open transactions automatically consolidate under the merged record.

Batch merge for large-scale data cleanups.

- Save hours of manual cleanup—merge multiple records at once with the Batch Merge function.

- Essential for businesses importing data into Business Central, ensuring a clean and organized ERP system.

Undo merges when needed.

- Easily reverse merges with Undo Merge History, restoring records if needed.

How it works in Dynamics 365 Business Central.

1
Identify duplicate records.

Customers, vendors, G/L accounts, and more.

2
Select merge target.

Define the correct record to retain.

3
Click and merge.

All data updates instantly, keeping ledger, sales history, and contacts intact.

4
Undo if needed.

Restore previous records in case of errors.

Why choose Merge Utility?

Ensures data accuracy and integrity.

Keep Business Central records clean and eliminate duplicates.

Essential for SBS customers.

Optimize Business Central after migrating data from other systems.

Saves hours of manual work.

Instantly merge or batch process large datasets.

Only available as an annual add-on.

Exclusive offering for businesses committed to maintaining data accuracy.
