

Streamline Subscriptions, Collections, Reporting, and Engagement.

Binary Stream's Subscription Billing Suite (SBS) Bundle integrates billing, receivables, collections, customer communication, payments, and financial reporting into a seamless solution. Designed to simplify processes and enhance efficiency, SBS empowers businesses to drive growth and streamline financial operations.

Embedded in Microsoft Dynamics 365 Business Central, SBS automates the order-to-cash process—from managing sales orders and contracts to streamlining revenue recognition—while ensuring compliance with ASC 606 and IFRS 15 standards.

Subscription Billing Suite: End-to-End Subscription Management.

Subscription Billing.

Simplify subscription management with tools to handle complex sales orders, automate contracts and billing, and streamline revenue recognition—empowering you to optimize recurring revenue processes.

AR & Collections.

Improve cash flow and streamline accounts receivable to automate collections with an embedded solution. It's not just about getting paid—it's about getting paid faster and more efficiently.

eMailer Manager.

Enhance customer communications with automated, tailored messaging that enhances engagement at every stage of the billing cycle, delivering clarity, efficiency, and customer satisfaction.

Subscription Portal.

Simplify CSP operations and seamlessly manage subscriptions, licenses, billing, and payments, while providing customers an intuitive platform for subscription management and payments within D365 BC.

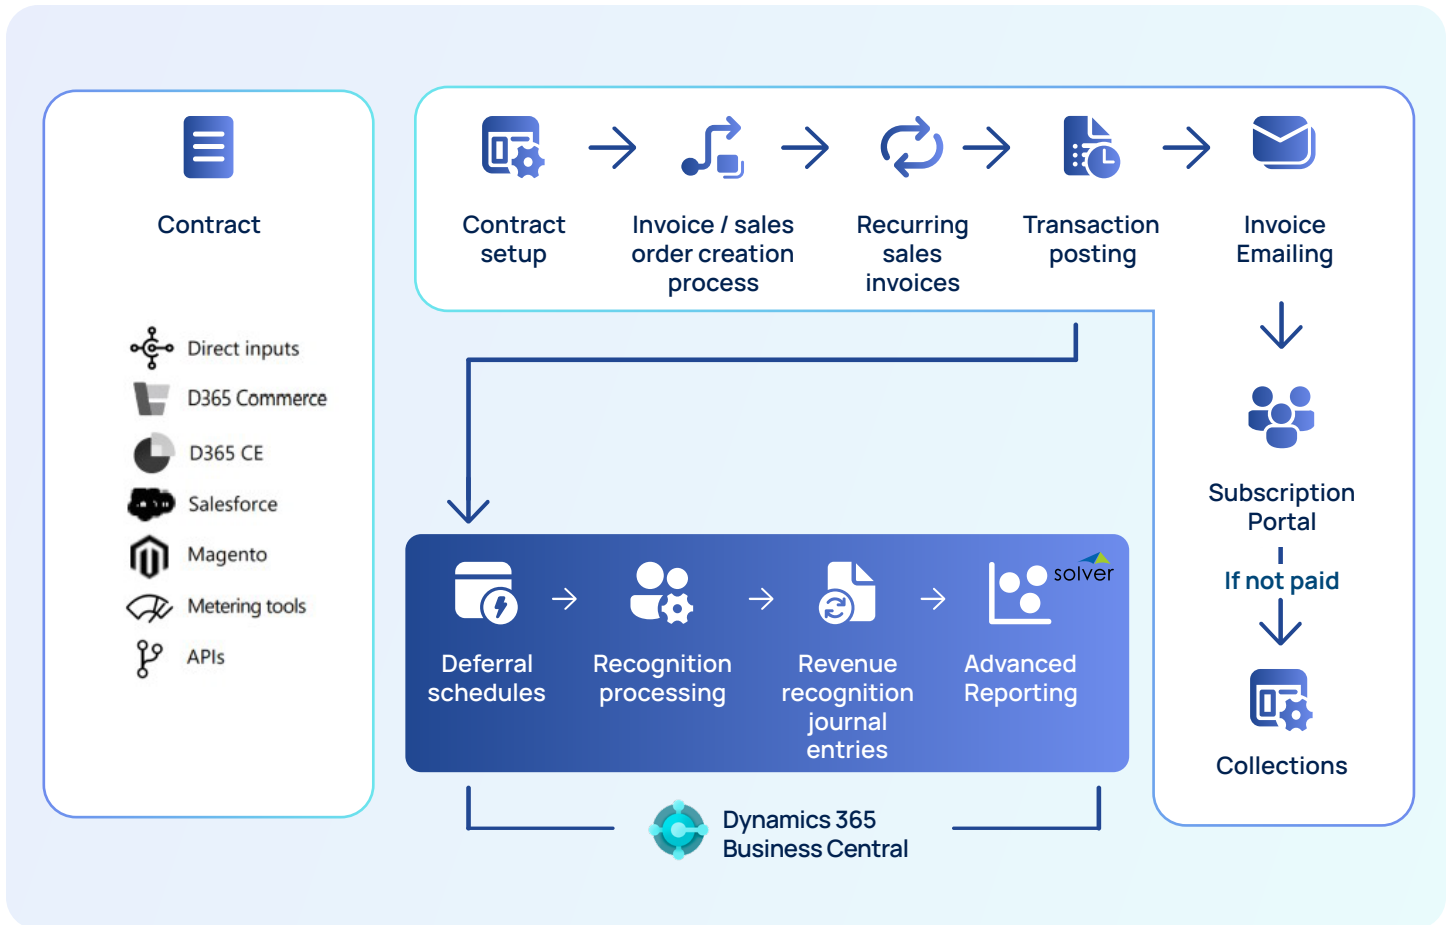

Advanced Reporting.

Gain deep insights into your revenue KPIs with advanced dashboards and reports. With Binary advanced reporting and financial planning tools, you've got proactive analysis and forecasting at your fingertips.

End-to-End Order-to-Cash Process Simplified.

This comprehensive diagram illustrates how Binary Stream's Subscription Billing Suite (SBS) is seamlessly embedded within Microsoft Dynamics 365 Business Central to automate every stage of the order-to-cash cycle.

Enabling compliance with ASC 606 / IFRS 15 in 5 easy steps.

- 1**
Identify the contracts with a customer.
- 2**
Identify the performance obligations in the contracts.
- 3**
Determine the transaction price.
- 4**
Allocate the transaction price to the contract's obligations.
- 5**
Recognize revenue as you satisfy the relevant obligation.

SBS vs Business Central Core: A Comprehensive Comparison.

This side-by-side comparison highlights how Binary Stream's Subscription Billing Suite (SBS) compares with the subscription capabilities of Microsoft Dynamics 365 Business Central.

With advanced features for billing, compliance, revenue recognition, and reporting, SBS provides a robust, end-to-end solution tailored for subscription-based businesses, far surpassing the core functionality of Business Central.
