# Healthcare industry win.

Multi-Entity  
Management

Subscription  
Billing

## Overview.

**Industry:** Healthcare

**Why it mattered:** Existing customer on GP, MEM, and SBS with complex billing cycles and many entities.

**Not a typical BC win:** Migration from GP to BC with advanced requirements that Binary Stream was able to close the gaps.

## Customer challenge.

**Limitations of native BC:** Couldn't handle 50+ entities and 3,000+ recurring subscriptions.

**Risks:** Manual work, scalability issues, revenue leakage, and delayed go-live.

## Why Binary Stream.

**Trusted solution:** Already using our GP tools — migration to BC was seamless.

**Peace of mind:** No customization needed, proven reliability, and simplified setup.

## Partner engagement & result

### How Binary Stream supported the deal.

- Conducted detailed reviews of BC requirements.
- Identified a perfect fit with no customization needed.
- Delivered multiple demos to showcase the BC environment.
- Client was confident and satisfied with the solution.

### Why the partner won

- Took ownership of the full migration cycle.
- Clearly explained GP vs. BC differences.
- Highlighted BC's value and how ISVs close gaps.
- Resulted in a smooth, successful project.

# Social Services Win

## Overview.

**Industry:** Social services (non-profit).

**Why it mattered:** Multi-location client needing to manage expenses and revenues by site.

**Not a typical BC win:** Required a solution that solved pain points without added customizations.

## Customer challenge.

**Limitations of native BC:** lease management solution that can help with both revenue and expenses. This is not handled by BC locally so an ISV was a must.

**Risks:** Manual work, scalability issues, revenue leakage, and delayed go-live.

## Why Binary Stream.

**Complete fit:** Our solution met all requirements without enhancements.

**Fully integrated:** Customer wanted a native BC experience—not a disconnected third-party ISV.

## Partner engagement & result

### How Binary Stream supported the deal.

- Met in person thanks to local proximity.
- Conducted detailed discussions and built a tailored demo.
- Showed exactly how the solution would look and function in their environment.

### Why the partner won.

- Already had an existing relationship with the client.
- Familiarity and trust helped streamline the decision and implementation.

Account Executive

# **Vertically Integrated Farm & Logistics Client**

# The Initial Decision

# The Friction

Microsoft Dynamics 365  
**Business Central**

Microsoft Dynamics 365  
**Business Central**

# The Turning point

Intercompany transactions with  
inventory and manufacturing module

Sell and ship goods to OR purchase and  
receive goods from another entity's  
warehouse

# The results.

## For the client

- Enabled expansion into new states with a scalable, high-volume solution
- Enhanced audit confidence and full transaction traceability

## For the Partner

- Retained a high-value client by keeping the project on Business Central despite initial risks

# **MSP – Financial Services Industry**

# Pressure Increases

# Early Attempts

# The Turning Point

	 Subscription Billing	 Microsoft Dynamics 365 Business Central
<u>Ability to Bundle Software, Services, &amp; Block time</u>	✓	✗
<u>Support for Complex Pricing</u> (I.E. Min & Max pricing + tiered pricing)	✓	✗
<u>Milestone Biling &amp; Batch Invoicing</u>	✓	✗
<u>Compliance</u> – ASC 606-compliant revenue allocation	✓	✗
<u>Flexibility to Adjust Deferral Schedules</u> – Customer wanted to adjust based on software activation	✓	✗
<u>Billing Partners on Customer Specific Pricing</u>	✓	✗

# The results.

## For the client

- Expanded capacity to serve larger, more complex MSP customers previously out of scope
- Enabled scalable, accurate billing to support international growth while controlling operational costs

## For the Partner

- Successfully delivered complex billing requirements within Business Central
- Retained a high-value client by stabilizing and future-proofing the implementation

**Adam Weinberg**  
Account Manager

# NGO – Child daycare Facilities

- Child daycare center NGO
  - 50 individual unit trusts
  - Differing lease structure
  - Long-term property leases with rates & water readings
- New CFO
- Required – consolidated lease management
  - Standardization of lease
  - Compliance with accounting standards
  - Standardized reporting

# Challenges.

Competing against **3 other** ERP vendors, with the customer leaning toward Business Central.

**Mandatory** ASC842 and IFRS16 compliance as part of the ERP selection requirements.

## **Custom and region-specific requirements**

- Chart of accounts modifications
- Consolidated expense reporting across shared entities

# Binary Stream's solution.

Deliver a scalable, region-ready leasing solution built  
**for Business Central**

## PLM as the Natural Fit

Given Business Central's limited native functionality, PLM was a natural fit, leading our partner to request a tailored demo.

## Tailored Discovery & Demo

Delivered a custom demo using a representative environment, lease structures, and real-world scenarios

## Simple, Scalable Configuration

Enabled region-specific configurations within a simple, efficient, and scalable solution framework

# The results.

Our partner won the RFP,  
and the client selected  
both BC and PLM.

The client's expected  
growth will lead to  
additional licensing of BC  
and PLM, increasing ARR.

PLM was added to the  
partner's existing  
catalogue, supporting  
future sales opportunities.

# New partner win – the background

- New partner, looking to collaborate
- Ongoing BC implementation, core BC insufficient
- Tank & trailer rental company
  - Established for 80 years
  - Rapid expansion -> IT systems overhaul
  - Required high-volume lease management
  - Both Lessor & Lessee scenario

# Challenges.

## **Advanced lease management functionality**

- High-volume leases – dozens per day
- Document management – e.g. insurance certificates
- 3rd party software integrations

## **Tight timelines for implementation**

- BC implementation ongoing
- Predefined go-live date

# Binary Stream's solution.

Deliver a scalable, region-ready leasing solution built  
**for Business Central**

## PLM Discovery

- MEM identified as a key benefit – 23 entities
- Inventory transfers between entities

## MEM + PLM demos conducted

MEM + PLM demos were delivered to the EU team to showcase end-to-end functionality.

## Adoption Outcome

Both solutions were approved and adopted immediately following the demonstrations.

# The results.

Key new win for both  
partner & Binary Stream.

Acquired a new high-  
value customer for  
Binary Stream.

Successfully delivered  
the project under  
extremely tight timelines.

Established a strategic  
working relationship to  
support ongoing  
collaboration and future  
opportunities.

# Marketing Updates

Neal Cranna  
VP of Marketing

# Product Update: MEM 1099 Update

- On January 15, 2026, Binary Stream released an announcement specifically for Multi-Entity Management (MEM) customers **on BC v26 or v27 who plan to file 1099 forms for the 2025 tax year using Business Central.**
- In this tax year, Binary Stream MEM does **not** support direct IRIS transmission to the IRS due to technical limitations.
- MEM supports alternative option by generating 1099 FIRE Report - If your customers want to use MEM to file 1099s
- The 1099 FIRE Report can be used for submission via the IRS FIRE system
- Next steps: Download the latest extension and contact Binary Stream Support [bcsupport@binarystream.com](mailto:bcsupport@binarystream.com) to help set up

# MEM Workshop

Binary Stream holding the First customer webinar next week

Title: Beyond the Basics: Uncover Multi-Entity Management capabilities and see what's coming next.

- Date: January 28, 2026
- Time: 11:00 AM (PST) / 2:00 PM (EST)

What you'll see there:

1. Uncover existing, powerful MEM features customers may not be using today, and learn how they simplify daily entity-based work. Example: Eliminations, price allocation and many more
2. Get a first look at exciting new features coming soon

Feel free to invite your customers to join the workshop, partners are welcome too!
